An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The title of the invention as been changed to: --Compact image projector having a mirror for reflecting received beam from a polarization beam splitter back to the polarization beam splitter--.

The following is an examiner's statement of reasons for allowance: The prior art or record fails to teach a device and it method, among other features, comprising a mirror adapted for reflecting a received beam from a polarization beam splitter back to the polarization beam splitter in which a first quarter wave plate imparts on the reflected beam a first polarization that causes the polarization beam splitter to direct the reflected beam to a spatial light modulator, wherein the spatial light modulator is adapted to spatially modulate the received beam from the polarization beam splitter and direct a resulting spatially modulated beam back to the polarization beam splitter, and a second quarter wave plate imparts on the spatially modulated beam a second polarization that causes the polarization beam splitter to direct the spatially modulated beam to an output port to form an output beam.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

I) Miyatake 5,327,270 discloses a light projection system having a polarization beam splitter with a plane mirror.
